

Manager Delegation of Timesheet and Absence Activity

As a manager, you are responsible for reviewing and approving absence requests and timesheets for your direct reports. These requests and timesheets are sent to you via PAC based on who reports to you.

However, in order to ensure that absence requests and timesheets are reviewed and approved in a timely fashion, you have the ability to delegate your review and approval authority to another manager (a proxy) within your School/Admin Unit. The proxy can then act on your behalf during the designated delegation period. Only those transactions submitted during the period of delegation will be visible to the proxy. Delegation periods should not exceed 3 months.

The Manager Delegation page can be easily accessed from the WorkCenter. The WorkCenter is a 'one stop shop' location that consolidates time and absence data providing managers a dashboard from which activities can be completed.

Delegation Key Points

- When a proxy approves absence requests he/she will be given a choice to select between his/her own transactions to approve and those of the delegator
- Transactions that were submitted and pending manager approval *before the Active delegation period* will not be accessible by the proxy. Any transactions that originally routed to the manager via workflow for approval will stay in that manager's queue. However, the delegator will still have a view of all transactions submitted during the delegation period
- Once a period of delegation has ended, a system process runs to clear out expired delegations. Until this process runs, any open delegations will remain active in the system and transactions will continue to route to the proxy via workflow. Additionally, if a manager cancels a delegation request he/she had previously submitted and the proxy already accepted the delegation request, the proxy will remain active until this process runs and any transactions submitted during this time would still route to the proxy.
